***Election/Restrictions***

1. Claim 1 is generic to a plurality of disclosed patentably distinct species comprising:

Species 1, the projectile comprising an inductive interface that permits only transfer of power between the target system and the external setter system.

Species 2, the projectile comprising an inductive interface that permits only transfer of data between the target system and the external setter system.

Species 3, the projectile comprising an inductive interface that permits transfer of both data and power between the target system and the external setter system.

2. Upon election of one of Species 1-3 as outlined above, the applicants' must further elect between the patentably distinct projectile embodiments:

Species A, the projectile having a target system inductive interface comprising a single coil.

Species B, the projectile having a target system interface comprising a pair of coils.

3. Upon election of one of Species A and B, the applicants' must elect between the patentably distinct magnetic core sub-species:

Sub-species  $\alpha$ , the magnetic core wherein the plastic material comprises manganese-zinc ferrite.

Sub-species  $\beta$ , the magnetic core wherein the plastic material comprises nickel-zinc ferrite.

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species between species 1 and 2, and a single disclosed species between species A and B, and a single disclosed sub-species between sub-species  $\alpha$  and sub-species  $\beta$ , even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
